

# TWO VIEWS OF RISK

## Environmental Problems:

- drinking water contamination
- pollution of lakes and streams
  - air pollution
  - hazardous waste
  - solid waste
  - acid rain
- loss of wildlife habitat
- global warming
- ozone depletion
- pesticides and food additives
- loss of wildness
- accidental releases
- too much environmental regulation
- loss of outdoor recreation
- workplace exposures
- indoor air pollution & radon

General public (survey) and "expert" (committee) views of risk associated with environmental hazards. "Environment 1991: Risk to Vermont and Vermonters", Vermont Agency of Natural Resources, Waterbury, VT, 1991.
